PROFILE

Operations, Strategy and Analytics Leader

Operations leader with 8+ years scaling multi-market service and logistics organizations, including direct leadership of six managers, approximately 120 employees, and 800+ contractors with operations P&L ownership. Delivered 35% cost reduction, record 97% on-time performance, and measurable partner gains while building forecasting, automation, and performance systems. Combines hands-on leadership with data, process design, and technology to turn complex operations into reliable, scalable models.

EXPERIENCE

Skipcart / 7-Eleven · Irving, TX

04/2025 – Present

Operations Support Lead

- Led performance improvement across national catering and on-demand delivery operations, connecting partner expectations, market execution, driver behavior, and system configuration.
- Delivered measurable gains across three priority partners within nine months, including reducing cancellations from approximately 50% to 0%, raising on-time delivery above 96%, and improving fulfillment reliability.
- Redesigned catering driver qualification and accountability rules, reducing fulfillment issue rates by over 90%.
- Built a progressive driver accountability system in Google Apps Script and Twilio that automated email and SMS communication for punctuality and order-compliance events.
- Designed a Databricks and Spark SQL quality-scoring pipeline using Bayesian adjusted rates, national and area-level tiers, and promotion/demotion criteria.
- Built weekly performance communications delivered to thousands of drivers and market teams, creating consistent visibility into expectations, results, and corrective actions.
- Created an internal operations tooling suite with geographic order mapping, order intelligence, performance exploration, GPS review, and root-cause analysis capabilities.
- Led process changes across ETA drift, pickup abandonment, communications, and workflow separation with Operations, Product, Data, and partner stakeholders.
- Presented findings, tradeoffs, risks, and implementation recommendations to operations leadership and cross-functional partners; earned an Exceeds Expectations annual performance rating.
- Designed and scaled a late-pickup accountability pilot across 10 markets, standardizing escalation rules and operational responses for repeat performance issues.
- Automated roughly 90% of the recurring accountability workflow through KNIME and communication triggers, reducing manual follow-up while preserving clear exception handling.

Foodja · Dallas, TX

03/2020 – 12/2024

Senior Manager of Operations | Manager, Market Operations & Delivery Partnerships

- Reported to the CEO and led Dispatch, Field, Driver, and Market Operations through six managers, approximately 120 employees, and more than 800 independent contractors while owning the operations P&L.
- Improved on-time delivery from approximately 90% to a record 97% within a 15-minute service window through capacity planning, dispatch controls, accountability, and process redesign.
- Reduced operating costs by 35% while supporting growth through P&L management, resource planning, vendor decisions, and workflow improvement.
- Redesigned contractor recruiting and onboarding, reducing acquisition costs by 85% and onboarding time by 70%.
- Developed predictive staffing methods and coordinated multi-region expansion with 95% forecast accuracy across staffing, workflow, and launch-readiness needs.
- Launched and scaled the Dallas market to more than \$500K in annual revenue before expanding operational responsibility across Texas and Arizona.
- Led app and workflow improvements that reduced false location reporting, improved arrival visibility, and automated client delay notifications that increased satisfaction by 20%.
- Owned Salesforce administration for customer service operations and implemented a quality-scoring and coaching workflow to improve consistency and accountability.
- Launched driver engagement and gamification programs that increased engagement and retention by 30%.
- Created companywide All Hands meetings, SOPs, and training materials that strengthened alignment, communication, and execution across growing teams.
- Led Dallas office buildout and operational readiness, coordinating vendors, facilities, systems, and launch requirements as the market scaled.
- Managed key client, restaurant, vendor, and field-equipment decisions to support consistent execution across growing markets.

Grubhub · Chandler, AZ 11/2018 – 03/2020

Market Operations Specialist

- Managed live delivery operations across more than 35 geographic areas supporting over 50,000 weekly orders and approximately 90% on-time performance.
- Identified fraud patterns and implemented operating controls that generated more than \$200,000 in annual savings.
- Coordinated corporate clients, restaurants, drivers, and internal teams to resolve high-priority service issues and protect customer outcomes during peak periods.
- Earned company recognition for performance, including Hits the Spot honors and Employee of the Month recognition twice.

Safelite AutoGlass · Chandler, AZ

05/2016 – 07/2018

Special Services Desk Representative | Inbound Sales Specialist

- Coordinated claims, appointment scheduling, insurance verification, warranty issues, and vendor support while improving appointment accuracy by 20% and maintaining approximately 95% customer satisfaction.
- Earlier in the tenure, exceeded a 50% inbound sales close rate against a 42% target and helped train peers on customer and sales workflows.

SKILLS

Operations Leadership: Multi-Market Operations · Distributed Workforce Leadership · Service Delivery · P&L Management · Capacity Planning · Operational Escalations

Analytics and Improvement: Databricks · Spark SQL · Tableau · Power BI · Excel · Forecasting · Root Cause Analysis · Lean Six Sigma

Systems and Automation: Salesforce · Google Apps Script · Twilio · KNIME · Python Scripting · HTML/JS Dashboards · REST APIs · AI-Assisted Prototyping

Leadership: Team Development · Executive Communication · Cross-Functional Execution · SOP Development · Change Management · Vendor and Partner Management

SELECTED PROJECTS

- Driver performance platform - combined scoring logic, progressive accountability, email/SMS automation, and recurring performance communications for thousands of drivers.
- Operations intelligence suite - built geographic order mapping, order dashboards, GPS review, performance exploration, and root-cause tools for faster decisions.
- Market expansion and workforce planning - launched Dallas to more than \$500K in annual revenue and used predictive staffing to support multi-region growth with 95% forecast accuracy.
- Service quality and automation - built Salesforce quality/coaching workflows and automated client communications that improved satisfaction by 20%.
